

To Council Members re parking lot at
Arthur St and the former land fill.

Not every resident is against, in fact
some are for it. My name is Linda Schlueter
I live at [REDACTED] and the area is
behind our property, mind you it is across
the creek. The folks at that address have
^{Arthur St.}
been one of the better neighbours we have
had. Mr Patesh. had the wreckers before
was a good neighbour as well, noise was at a
minimum and hardly any weekend work but
that being said not so for the few owners
after, ^{those said being wreckers and scrappers} work went well into the evening as well
as weekends including Holidays. We where
not happy campers That being said, I have
talked to several neighbours some are for
some against.

Also a note. my two nephews and brother
Keith Fulcher, Trevor Fulcher, Tyler Fulcher.
live on this street as well. We have a
little history on this street growing up down
the street [REDACTED] in the 60's till 1972
and then purchasing our now home on [REDACTED] in
the late 90's. So I have seen the transition
from Grandpa Bolendars open pit sawackers, gas
station as well as the dump to the time they
bulldozed the creek. -to remove? God knows what
when the park was named Centennial Park in 1967
to how what is Bolendar Park. We have seen
the park change and grow from what was a
really busy hangout for every teen in town to
what it is today.

The two companies that use the property today have supported this community in many ways supporting many sports teams and community efforts I transgress.

Points to be made.

Regarding the trees. Common sense needs to prevail ~~you~~ cannot replace size for size I have looked myself the trees in question, are you going to replace dead for dead?, and last I checked Manitoba Maple ^{are} is evasive.

Dust affecting play ground

The dust from the coming and goings of the vehicles that use the park, and it is full every weekend in the summer, create lots of dust no complaints that I know of.

Regarding the lighting The park is closed in the evenings and the lighting could possibly deter the unwanted use of the park. We have spent too many weekends cleaning up the aftermath!

Last but not least traffic.

Most people think all truck traffic goes down Church and Arthur, according to some folks, Riverside Dr E is used alot by trucks and a traffic study has not been done on our street for quite some time Not to mention the heavy use during planting and harvest times grains, hays, straws, manure - etc.

I was impressed with the work that ~~Council~~ staff and the owners of the property did. I think they did there due diligence

As for the petition, I am getting a little sick and tired that people who do not only NOT live in this Township or even this province dictate what we do in our backyards!

What we will get is a new fence, proper planting of trees a clean up of the dump property long overdue. Good neighbours no more oil and fluids because of it being a wrecker. Wild life is thriving behind us, we have mink, herons, muskrat hopefully no more beavers etc. Also regarding the trucks what about the Pet Plant and the bio they have there share of vehicles moving about. Any trucks that use our street are mostly respectful of speed and the stop sign, if they don't I call there company direct.

I apologize for the spelling, and the length of my banner. I can be contacted at [REDACTED] if you have further questions

P.S. check your map, you have Riverside ~~as~~ Church as well as the direction that the walking paths taking It's kinda going threw my brothers (Keith) property and shed. We have enough problems with folks who think our backyards are there personal right of way.

Thanks for your time
and efforts

Mr Vink
